help

i am a 16 year old boy living in the uk. last year i was arrested for reasons that aren't smart to list here enough that counter terrorism arrested me (i was not planning some attack, neither did i hurt anyone, was kept in a cell for roughly 8 hours and did a few interviews. in the time i spent in the cell, i slept, while sleeping, the police and a collection of intelligence agents put a chip in my brain capable of reading my life, simulating auditory experiences and controlling my mood. its been about two years since then and suddenly gained the ability to telepathically communicate with certain people. i have been attempting to poison my food, the telepathic conversation with a singular person around me) is pretty severely distressing and

working, what can i do?

Long term dph affects are fucking WEIRD

I've been on dph every day for 10 months now, and I'm still alive and kicking, but that only goes for my body because mentally I think I'm fried. When they say physical pain is a way for your brain to protect your body and people who don't feel pain usually die early because of that (I think it's called congenital analgesia (w choice of words but whatever)). Well, fuck me dead, because the same thing goes for the brain itself too. can't get rid of emotional pain without losing everything that makes you human. The brain literally needs to survive and develop. I did this shit for so long that my brain can't protect itself anymore. I did achieve w

Root canals

hey I'm wondering if anyone here has experience with infected root canals and if removing the teeth made symptoms easier?
