**SOLAR SYSTEM RENAMING —
EXTRATERRESTRIALISM MODERNIZATION EFFORTS**

Whereas the Planet Eris discovered in 3169 has provided the Disordian Society with a new home world to strive towards;

Whereas the Discordian Society should prefer to operate from the perspective of already inhabiting mentioned Planet Eris as to secure a greater claim in the face of public opinion;

Whereas the planet Eris is known to have a moon called Dysnomia;

Whereas the Discordian Society recognizes the wish of all Discordians to be referring to moon Dysnomia when speaking of "the moon";

Whereas the Interim-Representative Council of Episkoposes recognizes the need for modernization in terminology concerning both Astronomical Objects and Astronomical Bodies;

Whereas the Council cannot discern any positive change in attitude from any country or institute in regards to the dated terminology;

Whereas it may have a negative effect on the pride of members of the Discordian Society to see their moon less recognized than other moons;

Whereas recognition of the wishes of the Discordian Society brings to all people of earth an understanding of the continuing evolution of our representative Eristocracy;

Whereas the Discordian Society urges the adoption of new terminology in regards to the future plans of the Discordian Society; and

Whereas new terminology fits the era of most civilizations involved and our evolutionary progress in science: Now, therefore, be it

Resolved by the House of Apostles of Eris (the Rising Hodge concurring)
